COMMAND CENTER
SIMPLIFYING CYBERSECURITY

Autonomous Cybersecurity Operations

360° holistic view of your cyber risk posture

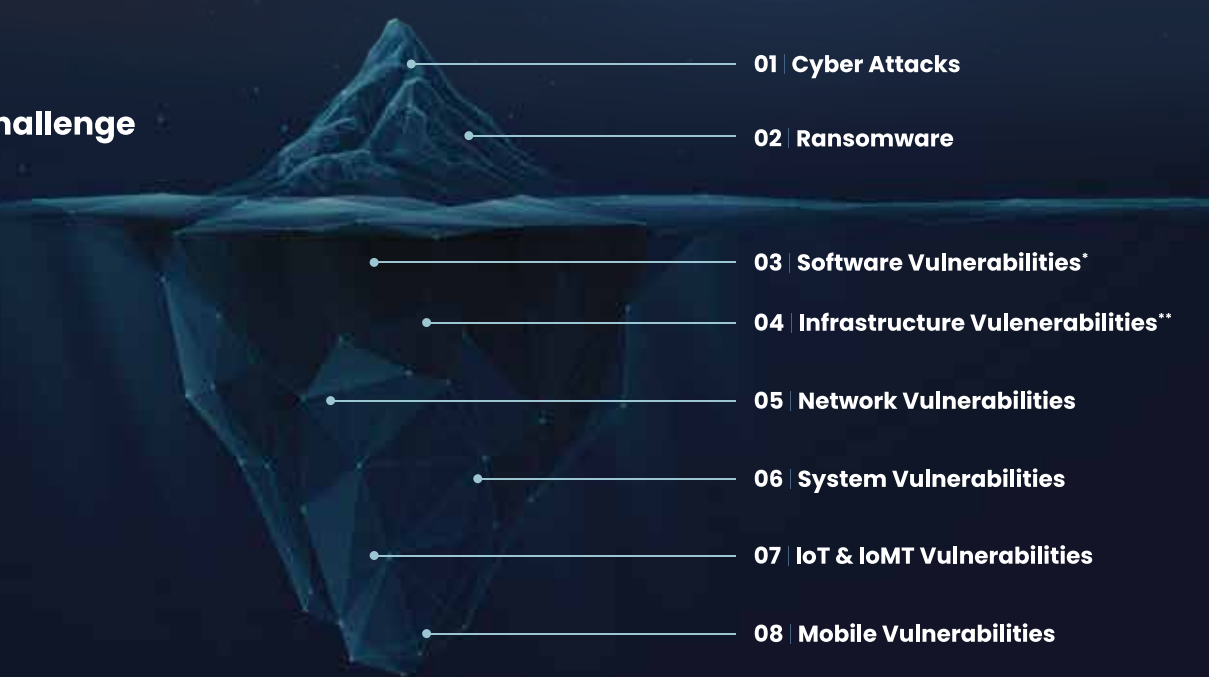

The Problem

The Cybersecurity Challenge

Businesses typically deploy **45 cybersecurity tools** on average to protect their applications, networks and systems.*

According to Hiscox, the average organization spends **21% of its IT budget on cybersecurity**, which is a **63% increase from 2020**.

According to research from Proofpoint, **94% of cloud customers** were targeted at some point during every month of 2023. Of those targeted companies, **62% were successfully compromised**.

In the United States, it took an average of **three days** for companies to discover a cyber incident in 2023.**

01 | **Cyber Attacks**

02 | **Ransomware**

03 | **Software Vulnerabilities***

04 | **Infrastructure Vulenerabilities****

05 | **Network Vulnerabilities**

06 | **System Vulnerabilities**

07 | **IoT & IoMT Vulnerabilities**

08 | **Mobile Vulnerabilities**

The Solution

Advanced Cybersecurity Mitigation

Command Center acts as a force multiplier for IT/cybersecurity teams and delivers an advanced cybersecurity mitigation platform that promotes visibility, is proactive, scalable, and synchronizes security, adaptable to any environment.

Detection of Vulnerabilities

Remediation of Vulnerabilities

Prevention of Vulnerabilities to Production

Protection of Assets in Production

Enforcement of Compliance on Assets in Production

Key Benefits

Cost Effective
No upfront prohibitive cost and need to purchase install and manage industry leading Command Center Enterprise application security risk posture solution.

Centralized Portal
Control and automation over all aspects of your enterprise application security posture management.

Multi-Tenant Platform
Command Center quickly scales to address your company's needs whether you have tens, hundreds or even thousands of assets.

Faster Compliance
Command Center provides fast compliance to existing security policies, processes and audit findings with our SLA Automation Compliance.

Easy Onboarding
Users interact with our solution workflow to initiate, configure, secure and monitor application security through a simple user interface.

Command Center can be scheduled to run Ad- Hoc, at regular daily, weekly, monthly, quarterly or annual intervals to provide ongoing monitoring of your organization's cybersecurity issues.
